A Benchmark in Laboratory Automation

Molecular biology laboratories need technology that is easy to use yet sufficiently flexible for a variety of applications. To meet this need, Applied Biosystems built upon its proven multicolor fluorescent labeling technology to achieve a completely automated, yet flexible system to sequence, size, and quantitate nucleic acids. This system is the ABI PRISM® 310 Genetic Analyzer.

The 310 Genetic Analyzer is the standard in laboratory convenience. After samples are placed in the sample tray, virtually all aspects of analysis are automated. There is no need to pour conventional polyacrylamide and agarose slab gels or to load samples for electrophoresis. Instead, every function—from sample and gel loading to data collection and analysis—is computer controlled. Equally important, preformulated ABI PRISM® polymers eliminate the guesswork involved with preparing gel materials. The convenience of the system is further enhanced by ABI PRISM® reagent kits for DNA sequencing or PCR product analysis and by access to Applied Biosystems worldwide technical support.

Key Features

Easy Instrument Set-up

Simply install the capillary, load the gel pump with polymer, place your samples in the autosampler tray, and instrument set-up is complete.

Automated Gel Loading

The 310 system gel pump automatically fills the capillary with either DNA sequencing or fragment analysis polymer. Switching from DNA sequencing to PCR product analysis is as easy as installing a different capillary and polymer.

ABI PRISM® Separation Polymers

The 310 Genetic Analyzer separates DNA fragments by using POP™ Performance Optimized Polymers, which yield extremely reproducible results.

The POP™ polymer family includes POP-6™ polymer for high-resolution applications such as DNA sequencing, and POP-4™ polymer, which provides faster runs for applications such as microsatellite analysis, AFLP® Kit, and rapid sequencing. We also offer a general purpose polymer that is user-modifiable for a variety of genotyping
This polymer allows you to alter polymer concentration or add reagents such as urea or glycerol.

**Multiple Dye Detection**

The 310 Genetic Analyzer simultaneously detects up to five different fluorescent dyes in a single capillary providing multicolor analysis. This process is further simplified by fluorescent terminator sequencing chemistry, which allows you to perform single-tube sequencing reactions. For genotyping, multicolor detection increases throughput by allowing you to multiplex several PCR samples labeled with multiple dyes. A labeled internal standard can be added to each run to provide exceptional fragment sizing reproducibility.

**ABI PRISM® System Integration**

The 310 Genetic Analyzer is fully integrated with proven ABI PRISM® reagents and software for DNA sequencing and genotyping applications. The ABI PRISM® 310 Analyzer Windows®-compatible system allows data to be easily transferred between different platforms such as the ABI PRISM® 3100 and 3100-Avant Genetic Analyzers as well as downstream analysis software, the industry standards for automated genotyping, sequencing, and mutation analysis.

**DNA Sizing and Quantitation**

**Template Types**
- PCR fragments
- Restriction fragments
- cDNA

**Fluorescent Dye-Labeling Strategies**
- 5’ dye-labeled primers

**DNA Sequencing**

**Template Types**
- Single-stranded DNA
- Double-stranded DNA
- PCR-generated DNA

**Fluorescent Dye-Labeling Strategies**
- 5’ dye-labeled primers
- Dye-labeled terminators (2’-, 3’-dideoxynucleoside triphosphates) for use with unlabeled primers

**Standard Primers**
- M13 reverse
- -21 M13
- T3
- T7
- SP6
- SK
- KS

**Hardware/Electronics**

**Detection Unit**
CCD camera detector monitors fluorescent wavelengths from 525 to 650 nm. Virtual filter sets are optimized for ABI PRISM® dye sets.

**Optics**
Excites dyes by the 488 and 514 nm lines of the 10 mW argon ion laser.

**Electrophoresis Power Supply**
Controls voltage from 100 V to 15 kV.

**Gel Pump**
Loads capillary with polymer; generates pressures up to 1,800 psi.

**Sample Trays**
Holds 48 or 96 sample tubes for unattended operation.

**Capillary Heat Plate**
Controls capillary temperature between ambient and 60°C.

**Windows® Computer**
Controls all system functions for DNA sequencing and genotyping.

**Optional Compatible Color Printer**

**Dimensions**

**Electrophoresis Unit**

iScience. To better understand the complex interaction of biological systems, life scientists are developing revolutionary approaches to discovery that unite technology, informatics, and traditional laboratory research. In partnership with our customers, Applied Biosystems provides the innovative products, services, and knowledge resources that make this new, Integrated Science possible.

Worldwide Sales Offices
Applied Biosystems vast distribution and service network, composed of highly trained support and applications personnel, reaches 150 countries on six continents. For international office locations, please call the division headquarters or refer to our Web site at www.appliedbiosystems.com

Applera Corporation is committed to providing the world’s leading technology and information for life scientists. Applera Corporation consists of the Applied Biosystems and Celera Genomics businesses.

## Custom Fluorescent Primer Service
- Dye-labeled Sequencing Primer Sets
- Dye-labeled GeneScan® Primers
- Five-dye compatible GeneScan® Primers

## Software
- 310 Data Collection Software
- GeneMapper® Software
- GeneMapper® ID Software
- Sequencing Analysis Software
- SeqScape® Software

## Included with Order
- ABI PRISM® 310 Genetic Analyzer
- ABI PRISM® 310 Genetic Analyzer User’s Manual
- Choice of Sequencing Analysis or Fragment Analysis Software
- ABI PRISM® Sequencing Analysis or Fragment Analysis Software Manual
- ABI PRISM® 310 DNA Sequencing or Fragment Analysis Chemistry Guide
- One-year limited warranty on parts and labor
- Service installation and chemical installation kit
- ABI PRISM® 310 Genetic Analyzer Operator Training CD
- Windows® Operating System computer
- Choice of 48- or 96-Well Autosampler Tray
